Dear Member,

Congratulations for meeting all of the accredited graduate requirements for AAPM® Board Certification. Our Board of Standards has voted to approve your board certification. Please begin using the acronyms and qualifications on your resume and websites at this time, and we recommend that you mount these handsome member documents and credentials proudly in your office or home.

As a new AAPM® Certified Member, we hope you have the opportunity to use the AAPM® quality marks and logos on your business cards, promotional materials, in your social networks, and or resume. Many officials and top managers around the world are seeking our certifications, and we are certain that the AAPM® can help your career, salary potential, and image.

The AAPM® will continue to serve our global members through our websites with exclusive member benefits, digital toolkits, newsletters, research and press opportunities, and listing on our international registry. Please be advised that we suggest that you complete the annual 15 hours of CE continuing education and maintain continued membership of good standing with our organization so we may continue to serve you. As a note, our global society holds registered trademarks and international copyrights to protect the AAPM® certification, programs and distinctions.

To read about our ethics guidelines, continuing education requirements, copy & download logos, download books, review standards, join our online professional advisory council network, or to download handbooks please go here:

Subject: Decision on a manuscript you reviewed for Annals of Microbiology - AMOA-D-22-00069 - [EMID:907e9906c5f1dc70]

AMOA-D-22-00069

Identification and Growth-promoting Effect of Endophytic Bacteria in Potato
Annals of Microbiology

Dear Dr. Candra,

We have made a decision on AMOA-D-22-00069, which you recently reviewed for us.

The decision is: Major revision.

You can also view the reviewers' comments at:

<https://www.editorialmanager.com/amo/>

If you have forgotten your username or password please use the "Send Login Details" link to get your login information. For security reasons, your password will be reset.

Thank you again for your contribution to Annals of Microbiology.

Best wishes,

Federica Troiano
Annals of Microbiology

Associate Editor's comments: Please address each of the comments of both reviewers and note that for comparative purposes you should only use 'Type' cultures.

Reviewer #1: The research is really important to develop the ecological agriculture. Some notes to the article are:

1. The conclusion in the abstract should be reconstructed
2. Please correct the words with yellow background, they are typos
3. Table 5 and 6 could be constructed in a single compact table. It would be more simple to follow the information and give an effective writing.
4. The conclusion needs to be reconstructed to be more recommendation based on the results/findings of this experiment. The present conclusion is more likely a discussion. Please, don't put a citation in the conclusion.

Please also see the attached file.

Reviewer #2: Dear Corresponding Author

I checked your paper and now I have some comments to improve your paper to publish in the journal:

- 1) Introduction is very short. You need to add the last findings of endophytic bacteria to PGP activities on plants.
- 2) There are so many spelling errors into main text and you have to resolve them. Scientific names should be italic. For instance, *Bacillus* and *E. coli* should be as italics and "robust ness" is not correct.
- 3) In phylogenetic trees, bootstrap values are really low and based on such percentages you cannot rely on species identification. You need to add more valid sequences from GenBank into your data for producing tree. I strongly suggest, you combine data from both of 16S-rRNA and *gyrB* gene sequences and use MrBayes program to inference phylogenetic tree.
- 4) What is the meaning of pan gene? I think it is not required and you have to focus to produce a tree with high bootstrap values for best identification.
- 5) In some cases you imply "*Bacillus* sp. K-9" and in some cases you wrote "*Bacillus velezensis* K-9". Which one is correct. Please unify it.
- 6) I strongly suggest you sequence whole genome of your bacteria and use genome page of Genbank to analysis. It will be provided more exact results.
- 7) About Figure 6 you need to have some photos that clearly showed differences between control and inoculated samples. In this figure I cannot see any difference.
- 8) Instead of tables (e.g., Tables 8) you have to use bar-charts with implied Tukey-HSD results.

With Best Regards
Reviewer

Managing Editor's comments:

The manuscript contains a number of phrases taken from other published papers, most notably in the Abstract, Introduction. We recommend these are reworked before peer review. Also We found overlap with an article by the same author(s) on a pre-print server which can be accessed at <https://assets.researchsquare.com/files/rs-1221321/v1/3f663ca2-a443-4f97-965a-0edb6cb99781.pdf?c=1643829632>. We recommend the author(s) provide the journal with information on this pre-print within their cover letter, author comments or references, as per the Springer Nature pre-print policy.

This letter contains confidential information, is for your own use, and should not be forwarded to third parties.

Recipients of this email are registered users within the Editorial Manager database for this journal. We will keep your information on file to use in the process of submitting, evaluating and publishing a manuscript. For more information on how we use your personal details please see our privacy policy at <https://www.springernature.com/production-privacy-policy>. If you no longer wish to receive messages from this journal or you have questions regarding database management, please contact the Publication Office at the link below.

In compliance with data protection regulations, you may request that we remove your personal registration details at any time. (Use the following URL: <https://www.editorialmanager.com/amoal/login.asp?a=r>). Please contact the publication office if you have any questions.

Subject: Decision on a manuscript you reviewed for Annals of Microbiology - AMOA-D-22-00069R2 - [EMID:519351734d691983]

AMOA-D-22-00069R2

Identification and Growth-promoting Effect of Endophytic Bacteria in Potato
Annals of Microbiology

Dear Dr. Candra,

We have made a decision on AMOA-D-22-00069R2, which you recently reviewed for us.

The decision is: Minor revision.

You can also view the reviewers' comments at:

<https://www.editorialmanager.com/amo/>

If you have forgotten your username or password please use the "Send Login Details" link to get your login information. For security reasons, your password will be reset.

Thank you again for your contribution to Annals of Microbiology.

Best wishes,

Federica Troiano
Annals of Microbiology

Reviewer #1: There are two typos, please make revision (the typos are marked with the yellow background). Please make revision to Table 1 (the accuracy between data and SD should be the same) due to the quality of data and Table 7 (different letters? Which data? Please see the data more carefully).

Please see the attached file.

Associate Editor; I have indicated where changes should be made in order for the manuscript to be accepted. These have to be done in addition to satisfying the comments of Reviewer 1:

Line 45-47: Sentences do not make sense-please reword;

Line 49, Many endophytes do not have the properties but only a few

Under Phylogenetic and genome analysis there are a number of missing data. The percentage similarity of the 16S rRNA gene should be indicated (similar to the GyrB sequence). What is the 'rate of similarity' with the branches of the phylogenetic tree? They are not required as they are not definitive.

The Phylogenetic trees are built using Type strains and not random strains in Genbank-this is because the information of Type strains have been validated.

Please make it clear whether the yield of potatoes from treated plants are significantly different from the untreated control as contradictory statements are provided.

Subject: Decision on a manuscript you reviewed for Annals of Microbiology - AMOA-D-22-00090 - [EMID:d5132e347e84caf2]

AMOA-D-22-00090

Marine fungal pigments from lab to potential applications

Annals of Microbiology

Dear Dr. Candra,

We have made a decision on AMOA-D-22-00090, which you recently reviewed for us.

The decision is: Reject after peer review.

You can also view the reviewers' comments at:

<https://www.editorialmanager.com/amo/>

If you have forgotten your username or password please use the "Send Login Details" link to get your login information. For security reasons, your password will be reset.

Thank you again for your contribution to Annals of Microbiology.

Best wishes,

Federica Troiano
Annals of Microbiology

Reviewer #1: The title is not representing the text. Marine fungal? In the text, there are only fungal in general.

Please add more information about the marine fungal.

This article is not really an article but more like an opinion. A review should show the data have been published as a research article, or at advance a basic information showing the potential development of science or technology (application of the science).

Reviewer #2: The review is too preliminary to be considered for publication at its present state. It is poorly written. It lacks a clear structure and the sub-topics are scarcely detailed to be treated as a review.

This review requires rigorous language corrections.

This letter contains confidential information, is for your own use, and should not be forwarded to third parties.

Subject: Decision on a manuscript you reviewed for Annals of Microbiology - AMOA-D-22-00069R1 - [EMID:1daab03280b2d8eb]

AMOA-D-22-00069R1

Identification and Growth-promoting Effect of Endophytic Bacteria in Potato
Annals of Microbiology

Dear Dr. Candra,

We have made a decision on AMOA-D-22-00069R1, which you recently reviewed for us.

The decision is: Major revision.

You can also view the reviewers' comments at:

<https://www.editorialmanager.com/amo/>

If you have forgotten your username or password please use the "Send Login Details" link to get your login information. For security reasons, your password will be reset.

Thank you again for your contribution to Annals of Microbiology.

Best wishes,

Federica Troiano
Annals of Microbiology

Associate Editor review: I have carried out a review of the manuscript and found that it requires a Major Revision in order for it to be accepted. Please note that you are required to have a line by line response to all the reviewer's comments.

My comments are as follows:

rDNA does not exist please change to rRNA gene.

The base pairs reported in GenBank is 1220 and not 1447 as stated in the manuscript-line 186

What is the Suarez method for IAA quantitation?

The FAME analysis method not provided-please add it in.

For the field trials, the medium NA was used as 'control' -This is highly unusual as it will allow growth of unknown microorganisms and is therefore not suitable as control.

The phylogenetic trees for strain K9 should be made with type strains only, and should use the same number of bps. Therefore, there is no point showing trees with other strains.

In Table 2 why is E. coli used, instead of the nearest type strain?

The same applies for Table 4 in which the professional way is to have a side by side comparison with the type strains.

Figure 5 does not show any growth for the 'nitrogen production qualitative analysis' – According to your notes it is an assay that depicts nitrogen-fixation and not nitrogen production. The same applies for the Phosphorous and the organic phosphate 'production assays' as these are not involved in production. Please check this out.

The statistical analysis was not done on the main parameter the yield of potatoes. The difference in values compared with the nutrient medium 'control' showed an overlap – therefore no difference would be expected. Can the authors confirm this. I suspect this was because the wrong type of control was used.

Reviewer #1: The article is more informative and easy to follow, however there are some points need to be more clearly described. The size of large potato and the commercial one is not fully clear. The size is also confusing. Please see the comments on the reviewed revised article attached.

Reviewer #2: Dear Corresponding Author

When a reviewer send some comments to you, he/she is waiting to do these comments and corrections into the paper.

About your paper, you receive comments from two reviewers and unfortunately you did not respond to comments.

We expect you never omit the comments because we spend our time to help you to improve your paper quality.

Anyway, in my viewpoint your paper in the current form is not qualified enough to publish in Annals of Microbiology.

With Best Regards
Reviewer

Annals of Microbiology

Associate Editor's comments: Please address each of the comments of both reviewers and note that for comparative purposes you should only use 'Type' cultures.

Reviewer #1: The research is really important to develop the ecological agriculture. Some notes to the article are:

1. The conclusion in the abstract should be reconstructed
2. Please correct the words with yellow background, they are typos
3. Table 5 and 6 could be constructed in a single compact table. It would be more simple to follow the information and give an effective writing.
4. The conclusion needs to be reconstructed to be more recommendation based on the results/findings of this experiment. The present conclusion is more likely a discussion. Please, don't put a citation in the conclusion.

Please also see the attached file.

Reviewer #2: Dear Corresponding Author

I checked your paper and now I have some comments to improve your paper to publish in the journal:

- 1) Introduction is very short. You need to add the last findings of endophytic bacteria to PGP activities on plants.
- 2) There are so many spelling errors into main text and you have to resolve them. Scientific names should be italic. For instance, *Bacillus* and *E. coli* should be as italics and "robust ness" is not correct.
- 3) In phylogenetic trees, bootstrap values are really low and based on such percentages you cannot rely on species identification. You need to add more valid sequences from GenBank into your data for producing tree. I strongly suggest, you combine data from both of 16S-rRNA and *gyrB* gene sequences and use MrBayes program to inference phylogenetic tree.
- 4) What is the meaning of pan gene? I think it is not required and you have to focus to produce a tree with high bootstrap values for best identification.
- 5) In some cases you imply "*Bacillus* sp. K-9" and in some cases you wrote "*Bacillus velezensis* K-9". Which one is correct. Please unify it.
- 6) I strongly suggest you sequence whole genome of your bacteria and use genome page of Genbank to analysis. It will be provided more exact results.
- 7) About Figure 6 you need to have some photos that clearly showed differences between control and inoculated samples. In this figure I cannot see any difference.
- 8) Instead of tables (e.g., Tables 8) you have to use bar-charts with implied Tukey-HSD results.

With Best Regards
Reviewer

Managing Editor's comments:

The manuscript contains a number of phrases taken from other published papers, most notably in the Abstract, Introduction. We recommend these are reworked before peer review. Also We found overlap with an article by the same author(s) on a pre-print server which can be accessed at <https://assets.researchsquare.com/files/rs-1221321/v1/3f663ca2-a443-4f97-965a-0edb6cb99781.pdf?c=1643829632>. We recommend the author(s) provide the journal with information on this pre-print within their cover letter, author comments or references, as per the Springer Nature pre-print policy.

This letter contains confidential information, is for your own use, and should not be forwarded to third parties.

Recipients of this email are registered users within the Editorial Manager database for this journal. We will keep your information on file to use in the process of submitting, evaluating and publishing a manuscript. For more information on how we use your personal details please see our privacy policy at <https://www.springernature.com/production-privacy-policy>. If you no longer wish to receive messages from this journal or you have questions regarding database management, please contact the Publication Office at the link below.

In compliance with data protection regulations, you may request that we remove your personal registration details at any time. (Use the following URL: <https://www.editorialmanager.com/amoal/login.asp?a=r>). Please contact the publication office if you have any questions.

2.	Sulistyo Prabowo, S. TP, M.P., MPH	Auditor

To perform inspection / audit to :

Name of Company	Country/City Destination	Kind of Product	Audit Date
Linyi Shansong Biological Products Co.,Ltd. (2633)	China	Soybean Derivative Product	June 7, 2013

With the job specifications:

1. To analyze flow chart of production process, to check original Halal Certificate and to check the last 2 (two) months purchasing document of raw materials.
2. To assess production process and raw material storage in the warehouse.
3. To acquire samples for laboratory analysis, if necessary.
4. To receive and to verify list of ingredients and matrix of ingredients versus products according to result of audit.
5. To audit implementation of Halal Assurance System.

Auditors have to work based on Islamic Law and Auditor's Code of Conduct. All written and unwritten data/information given by the company to the auditors should be treated as confidential data/information and only be used in their halal certification process.

We kindly request necessary assistances from any related parties to make this inspection successful. Thank you

Valid till: June 30, 2013

Dear Member,

Congratulations for meeting all of the accredited graduate requirements for AAPM® Board Certification. Our Board of Standards has voted to approve your board certification. Please begin using the acronyms and qualifications on your resume and websites at this time, and we recommend that you mount these handsome member documents and credentials proudly in your office or home.

As a new AAPM® Certified Member, we hope you have the opportunity to use the AAPM® quality marks and logos on your business cards, promotional materials, in your social networks, and or resume. Many officials and top managers around the world are seeking our certifications, and we are certain that the AAPM® can help your career, salary potential, and image.

The AAPM® will continue to serve our global members through our websites with exclusive member benefits, digital toolkits, newsletters, research and press opportunities, and listing on our international registry. Please be advised that we suggest that you complete the annual 15 hours of CE continuing education and maintain continued membership of good standing with our organization so we may continue to serve you. As a note, our global society holds registered trademarks and international copyrights to protect the AAPM® certification, programs and distinctions.

To read about our ethics guidelines, continuing education requirements, copy & download logos, download books, review standards, join our online professional advisory council network, or to download handbooks please go here:
